

VRAJ PANCHAL

Full Stack Developer & AI Enthusiast

📍 Anand, Gujarat | 📞 +91-7779044341 | ✉️ vraj100106@gmail.com | 🔗 LinkedIn | 🐙 GitHub | 🌐 Portfolio

Summary

Computer Engineering undergraduate focused on designing and developing scalable web applications with modern JavaScript technologies. Skilled in creating responsive frontend, secure backend services, authentication systems, and database-driven applications. Interested in software architecture, AI-powered solutions, and building products that deliver meaningful user experiences.

Education

Bachelor of Technology in Computer Engineering	2023 – Present
<i>Madhuben & Bhanubhai Patel Institute of Technology, CVM University</i>	CGPA: 7.86/10.00 (Till Sem VI)
Class XII (HSC)	2023
<i>RPTP Science School, Vallabh Vidyanagar, Anand</i>	58.92%
Class X (SSC)	2021
<i>Vir Vitthalbhai Patel High School, Karamsad, Anand</i>	94.83%

Skills

Languages : JavaScript, Java, C, C++

Frontend : React.js, Tailwind CSS, HTML, CSS

Backend : Node.js, Express.js, REST APIs

Databases: MySQL, PostgreSQL, MongoDB

Tools & Platforms: Git, GitHub, Docker, Postman

Core Concepts : Data Structures & Algorithms, OOP, Authentication & Authorization

Experience

Weavolve Solution – Frontend Developer Intern, Anand (Work From Office)	May 2026 – June 2026
– Worked on the development of a full-stack movie booking platform using the MERN stack. – Acquired practical experience in designing RESTful APIs, implementing JWT-based authentication, and integrating frontend and backend components within a MERN architecture. – Handled backend responsibilities including API development, JWT-based authentication, and database schema design. – Optimized responsiveness across desktop, tablet, and mobile devices.	

Projects

College Event Attendance Tracker (*Node.js, Express.js, MongoDB, JavaScript, HTML, CSS*)

- Built a full-stack event management platform for student registration and real-time attendance tracking.
- Secured all routes with JWT authentication, bcryptjs hashing, and RBAC enforcing separate access controls.
- Developed faculty dashboard with bulk attendance marking, CSV export, and Chart.js analytics.
- Integrated Multer for image uploads and EmailJS for OTP-based password recovery.

CareerPrep (*React.js, Node.js, Express.js, MongoDB, Gemini AI, JWT*)

- Built a full-stack AI career prep platform for resume analysis, mock interviews, and coding assessments.
- Implemented voice-to-voice mock interview simulator with transcription and communication flow analysis.
- Integrated Gemini AI for ATS resume scoring, keyword gap analysis, STAR-based interview feedback, and GitHub repository defense sessions.
- Developed a Monaco Editor coding workspace with multi-language support and semantic complexity evaluation.

FOMO Cinema (*React.js, Node.js, Express.js, MongoDB, JWT*)

- Built end-to-end a movie booking platform with seat selection, booking management, and cancellation flows.
- Developed admin dashboard with full CRUD for movies/shows, review moderation, Cloudinary image uploads, and soft-delete/restore functionality.
- Designed a scalable MongoDB data model to efficiently manage users, movies, shows, bookings, and contact requests, improving data consistency and application maintainability.
- Optimized application responsiveness and user experience through reusable React components, dynamic routing, form validation, and seamless frontend-backend integration.
