

VRAJ PANCHAL

Full Stack Developer & AI Enthusiast

📍 Anand, Gujarat | 📞 +91-7779044341 | ✉️ vraj100106@gmail.com | 🔗 LinkedIn | 🌐 GitHub | 📁 Portfolio

Summary

Computer Engineering undergraduate who enjoys building web applications from the ground up — REST APIs, Database design, and Responsive frontends. Curious about applying AI to solve real-world problems and continuously improving as a software engineer. Looking to contribute to a team where quality engineering and meaningful product impact go hand in hand.

Education

Bachelor of Technology in Computer Engineering	2023 – Present
<i>Madhuben & Bhanubhai Patel Institute of Technology, CVM University</i>	CGPA: 7.86/10.00 (Till Sem VI)
Class XII (HSC)	2023
<i>RPTP Science School, Vallabh Vidyanagar, Anand</i>	58.92%
Class X (SSC)	2021
<i>Vir Vitthalbhai Patel High School, Karamsad, Anand</i>	94.83%

Skills

Languages : JavaScript, Java, C, C++

Frontend : React.js, Tailwind CSS, HTML5, CSS3, Responsive Web Design

Backend : Node.js, Express.js, RESTful APIs, JWT Authentication

Databases : MongoDB, MySQL, PostgreSQL

Tools & Platforms : Git, GitHub, Postman, Vercel, Render, Docker

CS Fundamentals : Data Structures & Algorithms, OOP, DBMS, OS, Authentication & Authorization

Experience

Weavolve Solution – Web Development Intern, Anand (Work From Office) May 2026 – June 2026

- Contributed to the development of a full-stack movie booking platform by implementing frontend features, backend services, and booking workflows within a production codebase.
- Developed and integrated secure RESTful APIs with JWT-based authentication while designing scalable database schemas for users, movies, shows, and bookings.
- Improved application responsiveness and user experience across desktop, tablet, and mobile devices.

Projects

College Event Attendance Tracker github.com/VrajPanchal10

- Developed a full-stack event management platform supporting student registration, real-time attendance tracking, and role-based dashboards for students and faculty.
- Implemented secure authentication and authorization using JWT, bcryptjs, and RBAC, along with OTP-based account recovery to protect user access.
- Built faculty management tools with bulk attendance, CSV export, interactive analytics using Chart.js, and secure image uploads with Multer.

CareerPrep github.com/VrajPanchal10

- Developed a full-stack AI career preparation platform providing ATS resume analysis, voice-based mock interviews, GitHub repository reviews, and personalized career guidance.
- Engineered a voice-to-voice interview simulator with speech transcription, communication analysis, and STAR-based feedback to deliver realistic interview practice and actionable insights.
- Architected a multi-provider AI pipeline by integrating Gemini, Groq, OpenRouter, and Sarvam APIs, enabling intelligent task routing and automatic fallback for improved reliability and availability.

FoMo Cinema github.com/VrajPanchal10

- Developed an end-to-end movie ticket booking platform featuring seat selection, online booking, cancellation, booking management, and transactional email notifications.
- Built an admin dashboard with complete CRUD operations for movies and shows, review moderation, Cloudinary image uploads, Gmail REST API integration for email services, and soft-delete/restore functionality.
- Designed a scalable MongoDB schema and secured RESTful APIs to manage core data entities efficiently across the full booking lifecycle.
